

AAON Announces Changes To Refrigerant

As regulatory bodies require lower GWP from refrigerants, AAON has chosen R-454B as the way of the future

Key benefits of R-454B over R-32:

- Similar to R-410A for easier redesign of products
- Lower GWP will allow for continued use for many years
- Improved compressor efficiency
- Wider compressor operating range
- Lower temperature glide

Heating Season is Here!

Total HVAC Parts is stocked with gas valves, combustion blower motors, ignition controls, flue venting, and more!

← Big Stacks!

Over 100ft tall with a 32" inner diameter, these **MAS-SIVE** DuraVent flue stacks at the ESAP Cliff Heating & Cooling Plant are the culmination of years of work by Shariffe Ghadban.
