

Combustion Venting & Draft Control

DURAVENT®

Total HVAC partnered with DuraVent® in 2019 and have been proud to supply customers with high quality breeching and chimney equipment from their commercial product line. Our venting department strives to always provide excellent service to our customers and will continue to offer expertise that allows for the design and installation of safe, effective venting systems.

DuraVent®

Reasons to work with Total HVAC / DuraVent®

- In-house stock of various diameters, lengths, single / double wall, insulated double wall and pressure stack pipe to provide supplemental and replacement parts without delay.
- DuraVent® stainless steel products feature a toolless assembly system to ensure installation on-site is quick and simple.
- DuraVent® parts are fabricated in Montreal , reducing costs and shortening lead-times compared to other North American manufacturers.
- Our Venting / Draft Control team, consisting of Shariffe Ghadban (Sales Manager), Samir Elchamaa, and Dan Whittaker. These experienced professionals take great pride in maintaining the Total HVAC reputation for providing excellent customer service and support to everyone we do business with.

WILLIAMS™ Comfort Products

Total HVAC is a proud sales representative for WILLIAMS™ Comfort Products. Choosing from fan coil units with DX cooling, 2-pipe, 4-pipe, and electric heating options, we are able to provide equipment suitable for a wide range of ceiling mounted FCU applications.

Some pros of working with WILLIAMS™ are listed below:

- Heavy gauge galvanized steel cabinet with options for exposed applications with soft white epoxy finish.
- Versatile unit configurations including return air plenum assemblies and duct collars for return and supply air openings
- Wide variety of coil sizes and coil row/fin configurations available to meet capacity requirements without compromising equipment footprint.
