

MASTRON-OMIC NEWS!

Total HVAC has acquired Mastron Mechanical Ltd as we continue to expand the products we offer to our customers. This will allow us to offer a more complete purchasing experience as we gain access to new, high quality products. More information to be announced in future newsletters

New Hires!

Frederick Hartley

Fred is our newest engineering salesperson and he brings with him a proven track record in technical sales. He is excited to develop new professional relationships while expanding his knowledge base

Matan Zelikovitz

With over a decade in customer service, Matan joins our inside sales team experienced in working with clients. He is looking forward to learning about the HVAC industry, the manufacturing process, and the variety of products we sell at Total HVAC

Powerful P-Traps! Now in Stock!

Durable, Deep & Definitely Canadian

Forget the home depot! These are commercial grade traps for your Rooftop units. Multiple depths and fittings available in stock and we do custom orders to fit any tonnage as well. We can help figure out the correct depth for your high static applications to ensure proper sizing. Plus our new P-traps are made locally here in Ottawa!

Quick, Quality, & Quantitatively Efficient - TWA

Chilled beam, chilled sails, and how water radiant panels that allow you to decouple your thermal loads from your ventilation requirements. Create a comfortable, quiet, space without bringing in more air than you need to prevent over drying the area

Architects love the sleek look of chilled beams and panel solutions. Integrate your mechanical equipment seamlessly with the ceiling

Check out some projects from around Canada

The efficiency of induced draft through chilled beams creates a low exergy system that allows for much smaller boiler, chillers, or cooling towers. Using low temperature how water and high temperature chilled water creates massive energy savings throughout the building!

Made in Nisku, Alberta, TWA is flexible & adaptable with deliveries to site in 5 weeks or less! Need something immediate? TWA's production scheduling allows them to get emergency orders off within days!

Our largest TWA job ever, The Bank of Canada Museum, is featured on our website: [Click here to check it out](#)
